## **DETAILED ACTION**

### ***Status of Claims***

1. Claims 1-19 are pending.
2. Claims 1-19 are rejected.

### ***Information Disclosure Statement***

3. The information disclosure statement filed on December 1, 2003 has been reviewed and considered, see enclosed copy of PTO FORM 1449.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Art Unit: 1614

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Freed et al. of U.S. Patent No. 4,032,639. Freed et al. teach of tetrahydro-1H-pyrazino[1,2-a]quinoxaliny compounds, (see abstract and columns 1-2). In addition, Freed et al. teach of pharmaceutical preparations of these compounds, (see column 6). The prior art reference of Freed et al. teach of these compounds having an identical tetrahydro-1H-pyrazino[1,2-a]quinoxaliny base structure and other related substituents, such as hydrogen, lower alkyl. The claims differ from the reference by the incorporation of a proviso that "at least two R<sub>1</sub>, R<sub>2</sub>, R<sub>3</sub>, or R<sub>4</sub> or not hydrogen." One having ordinary skill in the art of organic and synthetic chemistry would have been motivated to select the claimed compound with the expectation that substitution of a lower alkyl group, such as a methyl group, for a hydrogen atom on the phenyl ring would not significantly alter the analogous properties of the Freed compound due to the close structural similarity of the compounds, see *In re Grunwell*, 203 USPQ 1055.
